

After half a century of searching for information, this website has been produced by a collector of old miniature maps and atlases for other enthusiasts. Following several long lapses in commitment, the research became a retirement project and a book was issued in 1996 by Map Collector Publications Ltd. A second and fully revised edition of *Miniature antique maps* was published in a smaller format by Tooley Adams & Co. in 2003. In 2013, the internet having changed everything, it was decided to put a sequel to the book online, extending its scope by two hundred years to 1900. Subsequently, this has been enlarged to create, in effect, a new and completely revised third edition of the book.
